

Environment Policy

The Company Shall:-

- Carry out its activities in a manner that reflects a great concern for the protection of the natural environment of the country and this planet.
- Extend the coverage and protection of rules, regulations and guidance to all employees.
- Comply and act within environmental legislation and regulations of the country and other requirements to which the Company subscribes.
- Constantly update, seek continuous improvement and increase awareness of environmental conservation including pollution prevention among its workforce and contractors.
- Seek out and implement environmentally beneficial actions that are economically acceptable or economically attractive to either our clients or us in so far as such actions do not dilute the quality of our standards or do not adversely affect the fulfillment of contractual obligations.
- Create a documented system whereby Senior Management may review the system and set environmental objectives and targets. Management shall ensure information is cascaded to all employees under their charge via toolbox talks and monthly meetings.

Hamed Rashid Al-Araimi
